Ho Chi Minh City ,Viet Nam

PROFESSIONAL SUMMARY

Finance student with strong foundation in corporate finance, valuation, and macroeconomic analysis. Experienced in building financial models, analyzing financial statements, and applying quantitative methods using Excel and Python. Demonstrated ability to translate complex financial data into structured insights for investment and business decision-making. Seeking analyst roles in corporate finance, investment, or research-driven environments.

EDUCATION

Vietnamese German University (VGU) – Binh Duong, Vietnam
Bachelor of Finance and Accounting | 2023 – 2027 (Expected)

PROFESSIONAL EXPERIENCE

Financial & Business Analysis Project (Academic / Independent) **| Jan 2024 – Present**
Financial Analyst

- Built an automated financial statement processing and reporting system using Excel and Python, transforming raw financial data into standardized analytical outputs for performance evaluation and valuation.
- Designed structured templates for income statement, balance sheet, and cash flow analysis to improve consistency and reduce manual processing time.
- Applied financial ratio analysis, trend analysis, and basic forecasting techniques to assess company profitability, liquidity, and solvency.

CFA Institute Research Challenge (HCMC) **| Oct 2025 – Dec 2025**
Equity Research Analyst

- Ranked Top 5 Team in Ho Chi Minh City in a competitive equity research challenge.
- Conducted comprehensive company valuation using **Residual Claim and SOTP(Sum of the part)** and relative valuation methodologies.
- Analyzed industry dynamics, company fundamentals, and macroeconomic factors to form an investment recommendation.
- Collaborated within a team to synthesize financial analysis into a professional equity research report and presentation.

IMF Macroeconomic Analysis Project **Feb 2024 – June 2024**
Research Assistant (Project-based)

- Analyzed macroeconomic indicators including interest rates, money supply, exchange rates, and inflation to assess financial stability.
- Supported regression-based analysis and composite index construction to evaluate macro-financial risk.
- Assisted in data cleaning, visualization, and interpretation using Excel and Python.

TECHNICAL SKILLS

- **Financial Analysis:** FSA, Valuation (DCF, SOTP), Forecasting, Scenario Analysis
- **Quantitative Methods**: Regression, Time Series, Monte Carlo Simulation
- **Tools:** Excel (financial models), Python (pandas, numpy), Power BI

ACHIEVEMENTS & ACTIVITIES

- Vice president of VGU Financial Economics Club
- Active participant in academic finance and business competitions
- Strong interest in quantitative finance, automation, and data-driven decision-making
